### ***Will You Succeed in a World Where...***

- Oil, cancer, AIDS, and passwords no longer exist?
- Cars drive themselves and bridges repair themselves?
- Space travel is easy, but a war in space is likely?
- People can live to be over 200 years old?

**You will if you develop the single most important skill  
set of the 21<sup>st</sup> century!**

The world is changing rapidly and the ability to create stunning and disruptive change is in more hands than ever. Business expert and educator, Eli Amdur tells employers, schools, and individuals how to prepare in order to survive and thrive.
